
9 Day Driver Training Camp - LEVEL II

Outline Programme

Schedule is designed to refresh and step-up skills for those who have previously taken our 9 day training camp.

- Day 1: 4wd Low Range and Self Recovery (Refresher)
- Day 2: 4wd Roadcraft I (Refresher)
- Day 3-4: 4wd Roadcraft II (Advanced Defensive Driving Techniques)
- Day 5: First Aid Training
- Day 6: Rest Day (Optional)
- Day 7: Advanced ASC: Security Driving (reversing) **
- Day 8-9: Advanced ASC: Security Driving (counter carjacking) **

Advanced Skills Course (ASC): Objectives include; precision space management, developing accuracy and consistency, “looking through” and planning within a **fluid driving environment, and to manage vulnerable driving situations. Exercises are performed under stress.

Module Description Summaries

- 4wd Low Range (refresher): Maximise traction & control when manoeuvring over uneven terrain.
- 4wd Self-Recovery (refresher): Safely use a variety of recovery gear; learn the steps to recovering a 4wd.
- Roadcraft I (refresher): Drive to the conditions; develop a pro-active mindset, hazard awareness, space management & roll-over prevention.
- Roadcraft II - Advanced Defensive Driving: Get a grip - take vehicle control skills to the next level; enhance understanding and management of vehicle dynamics. Techniques covered include; countering weight transfer, emergency braking on corners, swerve to avoid (using no brakes), skid control, understanding and countering over-steer and under-steer.
- First Aid: Emphasis is on vehicle related injury /trauma issues; i.e. severe bleeding, burns, head injuries, unconsciousness, and suspect c spine injuries.
- ASC: 4wd Security Driving (reversing): Advanced security skills-based training. Focus is on enhancing reversing skills. Exercises are performed at standard - high speed and include; straight line reversing, reverse slalom, reversing around corners, direction changes (i.e. modified K).
- ASC: 4wd Security Driving (counter car-jacking): Advanced security skills-based training. Focus is on urban threat recognition and avoidance /countering; threat and trends analysis, route planning, contingency planning, surveillance detection (anti and counter), understanding kill zones and options to avoid /evade them, taking over from an injured driver, step-aways, and barricade ramming.

Costs

The standard price for this course is US\$ 2,890.00 per student (excl VAT 18%).
